2016 PROJECT ACCOMPLISHMENT REPORT

I. Project Information

Project Code: CMRDV
Project Title: Formulating the Strategic Plan of the Bureau of Animal Industry (BAI)
Project Start: October 15, 2015
Project End: March 15, 2016
Project Price: Php 835,302.00
Client Organization: Bureau of Animal Industry (BAI)

II. Project Team

Project Manager: Peter Dan B. Baon
Team Members: Mariz P. Potestades
Supervising Fellow: Alvin P. Principe

III. Project Details

Project Description: The Bureau of Animal Industry (BAI), attached to the Department of Agriculture (DA), was created in 1930 by virtue of Act 3639 to investigate, study and report the cause of dangerous communicable diseases and the means of prevention, and in general to promote the development of the livestock industry. Moreover, the powers, functions and duties of then Bureau of Agriculture concerning domestic animals and animal diseases were transferred to and vested in the Bureau as enshrined in Section 5 of Act 3639.

BAI has undergone an organizational capacity assessment which aimed to identify areas that need strengthening to be more effective and efficient in the delivery of its mandates. As a result, organizational/institutional interventions were determined and one of which is in the area of planning. BAI identified the need for a strategic assessment and planning workshop to develop a medium-term strategic plan that will describe where the organization is right now in terms of their programs and interventions, where they want to go and the course of actions needed to guide them in defining their strategic medium-term directions.

In view of this, the Bureau requested the Development Academy of the Philippines (DAP) for an assistance in strategic plan formulation. In response, DAP proposes a technical assistance in formulating the strategic plan of BAI which aims to enhance its strategic management and planning process. This will help prepare BAI embark on a journey towards quality and performance excellence, as it pursues its mandate on the development and expansion of the livestock and poultry industries; prevention, control and eradication of animal diseases; governance of livestock product flow; and, standards prescription for quality in the manufacturing, importation, labeling, advertising, distribution and sale of livestock, poultry and allied industries.

Project Objective: The strategic planning intervention seeks to help the BAI define their strategic direction in the next five years.

Specifically, the DAP technical assistance allowed BAI to:

1. Re-visit its mission, vision and core values based on their mandate;
